

Know exactly where to apply — and why.

1 Build your longlist → 2 You pick your shortlist → 3 I build a deep dossier — one university at a time

WHAT YOU ACTUALLY GET — THREE PARTS

TIER 1 — THE LIST

The shortlist

Your real options, costed in ringgit.

- **20–40 uni + course matches** to your grades, budget & target countries — then you pick 3–5 to go deep on
- One spreadsheet, **34 columns** per uni, opens in Excel / Google Sheets
- Two scores kept **separate**: a 0–100 quality score vs **Reach / Match / Safety** — a uni you can't get into never ranks #1
- **Total cost of the whole degree in MYR** — not per year, so a 3-yr UK and 4-yr US degree compare fairly
- **Recognised in Malaysia?** flagged (MQA + professional body) — the gate for regulated careers
- Every row stamped **verified / not-yet**, so you know which numbers are actually checked

TIER 2 — THE DOSSIERS

The deep dive

Can I get in, will I belong, what will it take?

- A deep **PDF dossier** for each uni you shortlist — built one university at a time
- **16 sections** each, every one filled in — nothing left blank
- **"Who actually gets in"** — real admitted-student grades, activities & essay angles (offer-holder threads, US Common Data Set, NUS cutoffs)
- Full cost + scholarships — **government and company sponsors** (JPA / MARA / Yayasan and Petronas, Shell, Khazanah, Bank Negara...), visa & post-study work rights
- **"Will I belong"** — study intensity, student vibe, city feel, plus the halal / prayer / Malaysian- community angle
- Honest **"why hesitate"** on every uni — where it's weak *for you*, checked against the official page first

TIER 3 — THE APPLY PACK

The how-to-apply

Now go do it — nothing missed.

- A **ranked recommendation** of your finalists + a realistic apply strategy (UCAS's 5-choice cap, Oxbridge either/or, app-fee budget)
- **One deadline calendar** across every country — applications, scholarships, tests, visa lead times, in order
- A **per-region apply guide (PDF)** — US / UK / Australia / Singapore / China, grouped by system so shared work is done once
- Per uni: deadlines (incl. EA/ED + the separate aid deadline), tests, essays, fees + fee waivers, checklist, portal links
- **Real financial aid** — what it covers and what you still pay (flights, visa, the student contribution "100% of need" hides), in USD + approx MYR

THE COLUMNS THAT DECIDE IT — FOR EVERY UNI ON THE LIST

University · Course · Country · Desirability (0–100) · **Admission likelihood** · **Fits grades?** · Subject rank · **Approx total (MYR)** · Scholarship coverage · **Recognised in Malaysia?** · Key deadline · **Info source** + 22 more columns

These are the columns that actually decide it — plus 22 more behind every row.
