Team Name

One-liner about your solution

Team picture!

Problem Analysis & Identification

- What is the painful issue, frustration, or inefficiency that people are facing?
- Clearly define the core problem. Who is suffering from it?
- Provide data, statistics, or a quick relatable story to prove that this problem is real, big, and worth solving.

Ideation & Solution

- What is your solution to this problem?
- Briefly explain how your product/service will solve this problem and what the benefits are to the user

Market Validation

- What indication do you have that this solution is needed/wanted in the market? Did you speak to potential customers? What did they say?
- Any data from your own survey or market research would help to build up the business case.

Market Sizing

- How many potential customers are out there, and how much money could this business realistically make?
  - **TAM (Total Addressable Market):** The total global or national demand (e.g., Everyone who eats fast food in Malaysia).
  - **SAM (Serviceable Addressable Market):** The specific segment you can actually reach (e.g., University students who buy fast food in Selangor).
  - **SOM (Serviceable Obtainable Market):** Your realistic target for the first 1-2 years (e.g., Sunway students who buy fast food at Sunway Square).

Competitive Analysis

- How is your solution different from existing solutions in the market?
- Please provide any competitive advantages, such as cost, speed, efficiency, ease of use, etc.. This could look like something like this:
  - Imagine your team is building "EcoDrop": A smart, on-demand laundry service app designed specifically for busy college students, focusing on eco-friendly practices and ultra-fast delivery.

Feature / Advantage	Our Solution (EcoDrop)	Competitor A (Traditional Laundromat)	Competitor B (Standard Delivery Apps)
Eco-Friendly Detergents	✅ **Yes**	❌ No	❌ No
Average Delivery Speed	⚡ **Under 6 hours**	❌ Drop-off/Pick-up only	⏳ 24–48 hours
Student Pricing Discount	✅ **15% Off**	❌ No	❌ No
App-Based Tracking	✅ **Real-time**	❌ None	🔄 Basic updates
Pricing	💰 **Low ($)**	💰 Low ($)	💰💰 High ($$$)

Go-To-Market (GTM) Strategy

- What is your plan to acquire your first 100 to 1,000 users or paying customers?
- Your marketing and sales channels (e.g., campus ambassador programs, targeted social media, strategic partnerships).
- How you plan to scale up from a university pilot to the wider market.

Revenue Model & Financial Projection

- How much would it cost? Is there a potential revenue opportunity or cost saving? Please quantify as much as possible to show viability.
- How much needs to be invested to build and roll out the solution? Please break this down into some detail.

Team Info

- Why is your team the perfect group of people to execute this idea successfully?
  - Photos of the core founders (if have)
  - Names, operational roles (e.g., CEO, Tech Lead, Marketing Head), and their major strengths, courses of study, or past achievements.

Call to Action

- What do you want from the audience (Sunway iLabs) reading to this deck right now?
- Be explicit about what you need (e.g., "We are looking for technical mentors," "We are seeking RM10k equity-free seed funding," or "We want beta testers").
  - Include clear contact details (Email, LinkedIn QR code, or website).
