UNI & COURSE RESEARCH · BUILT FOR STUDENTS

University & Course Researching Service

Real universities that actually fit your grades and budget — not just the famous names.

HOW IT WORKS

1

Fill a 2-min form

Your grades, your budget, which countries you're considering. Don't know the exact course?

2

Get a list of universities of preferred course.

Every course that actually fits you in one country of your choice — costed, checked, sorted into real options.

3

Pick 1 uni to go deep on

You choose from anything on your list(s). I build a full **Research Report** of it

WHAT YOU ACTUALLY GET

01 — THE LIST

Your real options

Not just famous names — the ones that fit you.

- **8-12 universities and course** per country
- Every fee, requirement and deadline **checked on the actual university page**
- Sorted into **"you're probably in," "it's a stretch," "you're basically guaranteed"** — so at least you know what you're dealing with.
- **Full cost of the whole degree, in ringgit** — Includes tuition cost, living expenses, etc
- Highlights whether the degree even **counts back home** for medicine, engineering, law, and other licensed careers
- One spreadsheet you keep, opens in Google Sheets — with a plain-English glossary tab for every acronym

02 — THE REPORT

Your top picks, deep

Can I get in, will I like it, what will it take?

- A full **PDF** for each uni you pick — an actual document you can read to decide
- **Who actually gets in** — real grades, activities and essay angles from people who got offers
- What it's **actually like day to day** — workload, the vibe, the community.
- Full cost, plus every scholarship worth applying for — government and company sponsors
- Visa, work rights after you graduate, whether it's recognised back home
- **The part most people skip:** every report says why NOT to go. A list that only says nice things isn't one you can trust.

03 — THE APPLY GUIDE

Now go do it

Exactly what to do, in order, nothing missed.

- Every **deadline, test, essay and fee** for each uni you're applying to
- Grouped so **shared work only happens once** — not redoing the same steps six times
- The real **financial-aid math**: what's actually covered vs. what you still pay out of pocket
- **One calendar**, every deadline, every country, so nothing sneaks past you
- One region at a time (US, UK, Australia, Singapore, China) — built when you're ready for it

SEE IT FOR REAL

A REAL ROW FROM THE LIST

MIT · Mechanical Engineering (robotics track) · USA

Reach (very selective) · ≈RM 1.50M total, 4 years · Recognised in Malaysia — supports BEM registration

Want to see a full one? Just ask.

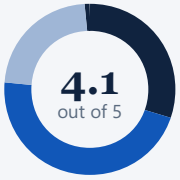
A REAL LINE FROM A REPORT

> *" 'Drinking from a firehose' (a phrase coined by a former MIT president) — the workload is genuinely heavy and relentless; students describe never fully 'catching up'."*

— from the "what's studying there like" section. It tells you the student life there, not just the fancy things of MIT.

WHAT STUDENTS SAY

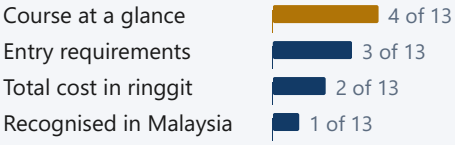
ON THE SPREADSHEET



How confident do you feel narrowing down your choices with it?

- 5 — 4 students
- 4 — 6 students
- 3 — 3 students

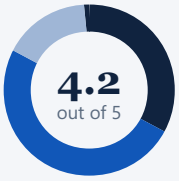
MOST USEFUL COLUMN



> *"There are a lot of universities I haven't seen before."*

> *"I really like how it's divided into many different parts and comprises of everything, from the basic scratch up till the very detailed parts, such as campus life and the traditions within the school. It allowed me to gain a better understanding of the school that I desire and also what i would be able to expect there."*

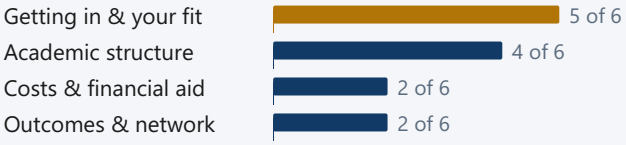
ON THE REPORT



How much time did it save you in your university research?

- 5 — 2 students
- 4 — 3 students
- 3 — 1 student

GAVE THE MOST CLARITY



MOST INTERESTING TO READ

Start with the free form

2 minutes to fill. I'll message you once your list is ready.
